Tamayo, Carl Jeffrey C.

(Web Developer/Backend)

Phone: (+63) 9222530773 Email: carljeffreytamayo@gmail.com LinkedIn: http://www.linkedin.com/in/cj-tamayo-335a972aa

Education

National University – Baliwag
Bachelor of Science in Information Technology with Specialization in Mobile and Web Applications

- Mobile Development, Web Development, Database Management, Software Engineering

Technical Skills

Languages: JavaScript, HTML5, CSS, SQL, PHP, Python, C++, C#, Java, Flutter

Developer Tools: GitHub, MySQL, Firebase, Visual Studio, Visual Studio, Notion, Figma

Libraries & Frameworks: Bootstrap

Achievements

APPCON 2024 – Excellence Award (Team Antechtors)
– SoilTrack: Soil Nutrients Monitoring and Automated Irrigation System with Data Analytics

16TH AMY INNOVATION AWARDS 2025 – Finalist (Team Antechtors)
– SoilTrack: Soil Nutrients Monitoring and Automated Irrigation System with Data Analytics

Projects

Ordering Web System for Anastasia Cafe *(Backend Developer)* **| MySQL| PHP| HTML| JS**

- Developed a web-based ordering and reservation system for efficient cafe operations
- Designed and managed a MySQL database to handle menu items, orders, and customer details
- Implemented backend features for order tracking, inventory updates, and admin management
- Ensured smooth functionality and usability for both customer and administrator interfaces

Clinic Management System for St. Jude Tenejero Maternity and Lying-in Clinic *(Backend Developer)* ***| MySQL| PHP| HTML| JS***

- Developed and maintained the backend system to manage patient records, appointments, and billing
- Designed and optimized the MySQL database for secure and efficient data handling
- Integrated automated report generation for patient logs and clinic operations
- Implemented authentication and role-based access control for staff and administrators

SoilTrack: Soil Nutrients Monitoring and Automated Irrigation System with Data Analytics *(IoT Engineer)* **| Arduino IDE| C++**

- Assembled and configured hardware components including soil moisture, temperature, and nutrient sensors
- Programmed microcontrollers to collect real-time sensor data and control irrigation pumps automatically
- Designed and wired relay modules, power supplies, and water valves for automated field operation
- Calibrated sensors and optimized circuit design to ensure accurate and reliable measurements

Academic / Project Experience

- Developed backend systems for ordering and clinic management platforms
- Built backend applications using MySQL, PHP, and JavaScript for dynamic data-driven operations
- Collaborated on an IoT-based agricultural project focused on automation and sensor integration
